***Claims Allowed***

Claims 13-24 are allowable over the prior art of record. The claims are allowable because the prior art does not anticipate nor render obvious the claimed subject matter of: a hydraulic circuit for controlling a clutch/brake system comprising a clutch and a brake, wherein the clutch is disposed separately from the brake in a main drive of a mechanical press, wherein the brake is spring-loaded in a direction opposite to an engagement direction of the clutch; the hydraulic circuit comprising: a piston/cylinder unit adapted to move the clutch and the brake into a coupling position of the clutch and a braking position of the brake, respectively; a press safety valve; a pressure line connecting the press safety valve to the piston/cylinder unit for generating torque at the clutch; a metering piston unit; a bidirectionally passable hydraulic connection connecting the metering piston unit to the piston/cylinder unit in parallel to the press safety valve.

No particular single feature of the claim renders the claim as a whole patentable. Only the claim taken as a whole combination is deemed new and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Prior Art Discussed***

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed December 14, 2005. None of the references show all of the features of the claimed invention, nor do they show that it would have been obvious to one of ordinary skill
